

### A time tracking tool YOUR EMPLOYEES WILL LIKE

Get metrics and control of your resources, processes and projects

Fast, easy and powerful – Takes LESS THAN 2 MINUTES A DAY

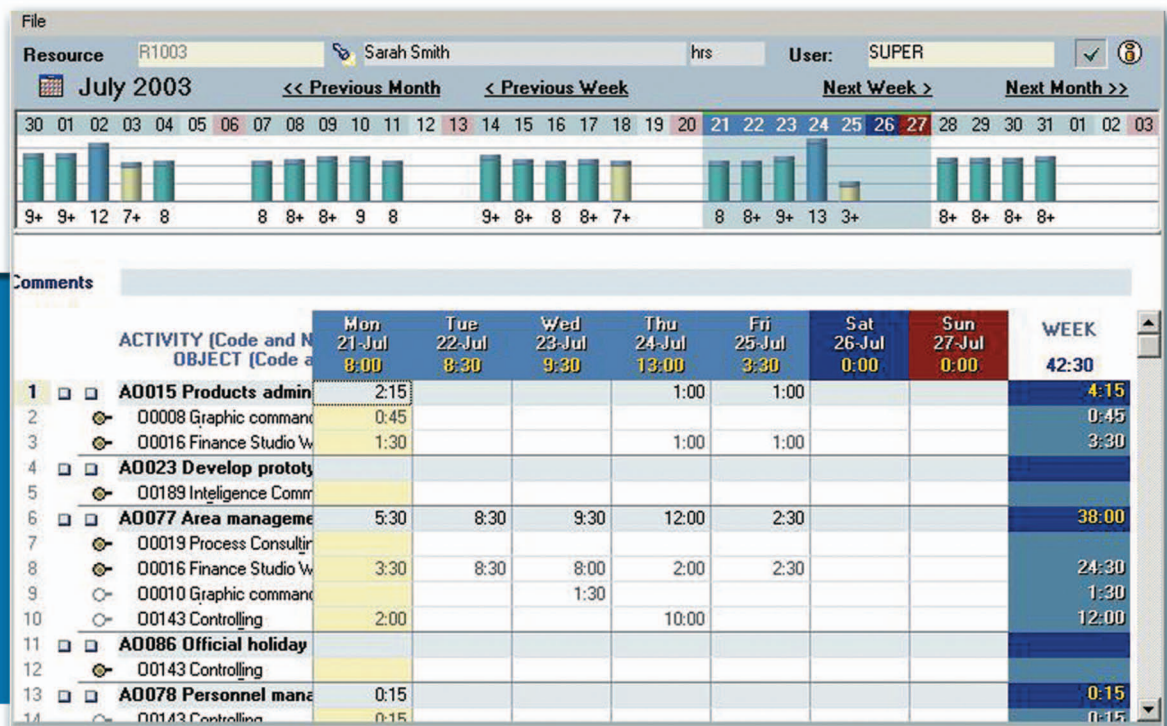

### Fast and Easy

**GaussSoft's Activity Report** provides predefined, easy to use, and easy to learn employee-customizable layouts. Each employee can report daily activities in less than 2 minutes. Web-based, it can be used on the road or at the office.

### Powerful

The user enters time spent on each activity, product, customer, project, or other predefined task. This detailed data can then be analyzed using **GaussSoft's** patent-pending Business Intelligence reporting tools, giving you accurate and detailed information for metrics, performance, resource and process management, advanced analysis and cost control.

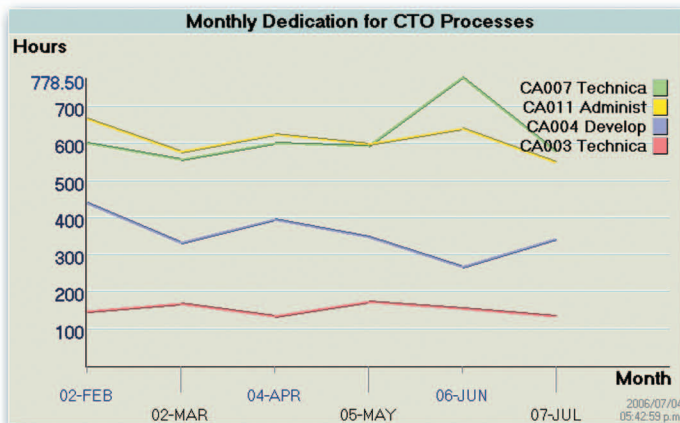

The User not only inputs time for the activity, for instance 'Area Management', but also for the object of that activity, in this case the name of each project.

## Process Metrics

How many hours are spent on accounts receivable, product design, product development, customer support or staff meetings? How many hours are spent per customer or product?

**GaussSoft** helps provide better intelligence for better decisions. You can get accurate metrics, including trends and details by customer, product or area. The next time you need to revise your business plan, provide metrics, or analyze pricing, you will have accurate and detailed information.

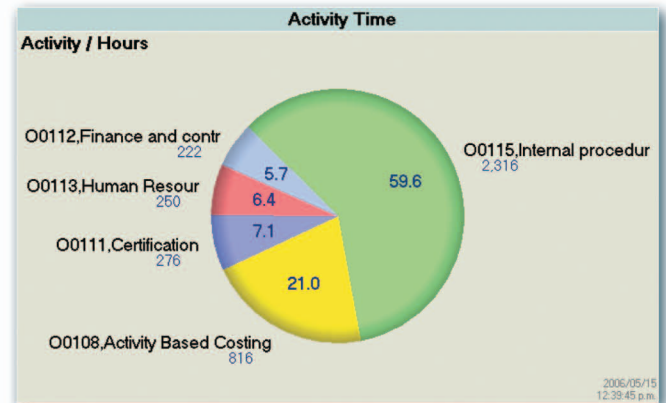

Activity report let you analyze your processes behavior along different periods of time

## Accurate Cost Control

**Activity Report** data can be used with **GaussSoft's** Profit and Cost solution. With **GaussSoft's** Profit and Cost you will also have accurate cost per resource, activity, process, area, project, customer, product, service and any other custom defined analysis object.

## Performance

Companies around the world have discovered the benefit of using **GaussSoft's** solutions. Our experience shows that by using **Activity Report**, employees become more efficient and focus on activities that truly add value.

Easily build graphics to have a view about your employees' time-distribution, at a glance

## Resource management

Employees are always busy, but how much of their time is spent on activities that add value to the company? Are they as efficient as needed? Is staffing sufficient to meet demand?

## Benchmarking

Does one region require more customer support time than another? Does a particular customer require more support than others? How does employee productivity compare?

**GaussSoft's Activity Report** is a tool that promotes efficiency and gives accurate and detailed information on metrics, performance, resource and process management, advanced analysis and cost control.
