

Choose the best Radial Viewer SE Edition for you:

For the users (single user and clients) you need at least one star of your choice to access the type of information you need to analyze. You can buy additional stars for each user, according to your needs.

The stars available are: Sales, Financial (includes a Transactions star also), Accounts Receivable, Accounts Payable, Jobs and Time tracking.

For the multi-user server and consolidation server, you need at least one client. Server licenses don't include any stars or reporting users.

Use the product codes for reference at our Store; please visit www.gausssoftstore.com

What is an edition?

We provide 4 different editions, each one oriented to cover certain particularities: Number of users accessing the reports and dashboards; and, Number of QuickBooks files to be managed, and if simultaneously or not.

Editions are: Consolidation, Multiuser, Single user, Accountant.

All editions are software installed in your own infrastructure; your information is always in your hands, not in our servers.

PERPETUAL OR TEMPORAL: Consolidation, Multiuser and Single user are perpetual licensing. Accountant is a one-year license.

Individual components or Combos?

We have designed Combos for consolidation and multiuser editions, to make it easier for you to select a basic solution, but you can select individual products if you want to customize each user with the specific stars you need.

Within each edition you will find basic combos and the individual components. Combos are not required for Accountant edition according to the extent of the product.

SUPPORT AND UPDATES SERVICES: Each combo includes one year support and updates services for your product. For support and updates services for your individual components or for additional years, please check <http://www.gausssoftstore.com/adsu.html>. Support and updates services don't apply to Files (item **B** below) or Stars (item **D** below).

Consolidation:

This edition is designed for companies or groups of companies who operate *QuickBooks®* using separate files but need to consolidate that information to create integrated reports, graphs and dashboards. Cases include different companies from the same share holders; companies with different branches, each branch using a separate QuickBooks file; or companies and branches located in different countries.

This edition serves to consolidate information from different *QuickBooks®* files in one data mart so the user can analyze information and generate reports including the Company/Branch dimension in the stars. It is useful for consolidation and comparative

purposes for a company who has different branches or operation points with independent QuickBooks® files.

The consolidation edition does not consolidate QuickBooks files into a single file; is not intended for a single time consolidation of files (is intended to use when you need to keep working with your separated files).

INDIVIDUAL COMPONENTS:

- **A. CONSOLIDATION SERVER:** A server component is installed in a company's computer. This component synchronizes the data from several QuickBooks files and consolidates them in a single database. This component has to be purchased separately, and does not include a reporting user.
Product codes: LIC-RVSE-CE-SERVER
- **B. QUICKBOOKS FILES:** The synchronization component starts with a limit of 3 QuickBooks files. If you want to consolidate more files, you need to license access to 1 additional file, or special packages for more files with special prices.
Product code: LIC-RVSE-CF-01, LIC-RVSE-CF-10, LIC-RVSE-CF-20, LIC-RVSE-CF-50, LIC-RVSE-CF-100
- **C. USERS (CLIENTS):** The consolidation user works in multi-user environment. You can purchase additional users (one or more) that connect to the server and access the consolidated files. For each user, you must buy at least one star of your choice.
Product code: LIC-RVSE-CL-01
- **D. STARS FOR EACH USER:** You can purchase additional stars for each user, according to your needs.
Product codes: CUB-RVSE-SC-FC-01, CUB-RVSE-SC-SC-01, CUB-RVSE-SC-AR-01, CUB-RVSE-SC-AP01, CUB-RVSE-SC-JC-01, CUB-RVSE-SC-TC-01, CUB-RVSE-SC-KC-01,

COMBOS:

- **E. STANDARD CONSOLIDATION:** When you need to access financial results and transactions; with this combo you'll get also Sales. Includes a consolidation server for 3 QuickBooks files, and a Standard user (check item **G**).
Product codes: CMB-RVSE-CNST-01
- **F. ADVANCED CONSOLIDATION:** When you need to access to all the information available at RVSE, you need all the stars! Includes a consolidation server for 3 QuickBooks files, and an Advanced user (check item **H**).
Product codes: CMB-RVSE-CNAD-01
- **NEED MORE FILES WITH YOUR COMBO?** Additional QuickBooks Files can be added using individual components (check item **B**).
- **NEED MORE USERS WITH YOUR COMBO?** Additional Users and Stars can be added using individual components (check items **C** and **D**). Or you can add Combo users:
 - **G. STANDARD USER:** Need a user to access financial results and Sales? Includes one user with Financial/Transactions and Sales stars.
Product codes: CMB-RVSE-USST-01
 - **H. ADVANCED USER:** Need a user with access to all the information available at RVSE? Includes one user with all stars.
Product codes: CMB-RVSE-USAD-01

Multi user:

This edition is intended to be used for more than one user in the same network, accessing information of a single QuickBooks file .

INDIVIDUAL COMPONENTS:

- **I. MULTIUSER SERVER:** A server component is installed in a company's computer. This component synchronizes the data from the QuickBooks file selected. This component has to be purchased separately, and does not include a reporting user.
Product code: [LIC-RVSE-MU-SERVER](#)
- **C. USERS (CLIENTS):** The consolidation user works in multi-user environment. You can purchase additional users (one or more) that connect to the server and access the consolidated files. For each user, you must buy at least one star of your choice.
Product code: [LIC-RVSE-CL-01](#)
- **D. STARS FOR EACH USER:** You can purchase additional stars for each user, according to your needs.
Product codes: [CUB-RVSE-SC-FC-01](#), [CUB-RVSE-SC-SC-01](#), [CUB-RVSE-SC-AR-01](#), [CUB-RVSE-SC-AP01](#), [CUB-RVSE-SC-JC-01](#), [CUB-RVSE-SC-TC-01](#), [CUB-RVSE-SC-KC-01](#),

COMBOS:

- **J. STANDARD MULTIUSER:** When you need to access financial results and transactions for three users; with this combo you'll get also Sales. Includes a multiuser server, and 3 Standard users (check item **G**).
Product codes: [CMB-RVSE-MUST-01](#)
- **K. ADVANCED MULTIUSER:** When you need to access to all the information available at RVSE, you need all the stars for your users! Includes a multiuser server, and 3 Advanced users (check item **H**).
Product codes: [CMB-RVSE-MUAD-01](#)
- **NEED MORE USERS WITH YOUR COMBO?** Additional Users and Stars can be added using individual components (check items **C** and **D**). Or you can add Combo users (check items **G** and **H**).

Single User:

This edition is designed for a single user accessing information from a single company.

This edition should be installed on the same computer where QuickBooks® is running. For updating purposes, QuickBooks® files can be anywhere on the local network. The data mart is generated and installed on the same computer where the software is installed and is not to be shared among multiple users.

If you want to have several users in your company, the Multi-user Edition is better. If you still want to install the single edition to many users, beware that each user will have a full copy of the data, wasting disk space and resources, and each one is responsible to synchronize his data from *QuickBooks®* files.

This edition will only let you access one QuickBooks file only. If you want to switch between files you must buy the Accountants edition. If you want to compare or integrate files, you need the Consolidation edition.

- **L. SINGLE USER:** A database component is installed in a company's computer with QuickBooks installed. This component synchronizes the data from the QuickBooks file selected. Includes a reporting user with database.
Product code: [LIC-RVSE-SU-01](#)

- **D. STARS FOR THE USER:** You can purchase stars for the user, according to your needs.
Product codes: CUB-RVSE-SC-FC-01, CUB-RVSE-SC-SC-01, CUB-RVSE-SC-AR-01, CUB-RVSE-SC-AP01, CUB-RVSE-SC-JC-01, CUB-RVSE-SC-TC-01, CUB-RVSE-SC-KC-01,

COMBOS:

- **M. STANDARD SINGLE USER:** When you need to access financial results and transactions for one user to one file; with this combo you'll get also Sales. Includes a single user (including database) with Financial/Transactions and Sales stars (check item **G**).
Product codes: CMB-RVSE-SUST-01
- **N. ADVANCED SINGLE USER:** When you need to access to all the information available at RVSE, you need all the stars for your user! Includes single user (including database) with all stars (check item **H**).
Product codes: CMB-RVSE-SUAD-01

Accountant:

This edition is for accountants providing value added services for their customers, each one with a single file; the accountant edition will store information from multiple QuickBooks files but accessing information from a single QuickBooks file at a time.

This edition is the only one not available for perpetual licensing; prices below are **one-year fees**. Once your one-year period finished, your license will expire and will need a new one to be able to access again to your database, your user and to synchronize again.

This edition should be installed on the same computer where QuickBooks® is running. For updating purposes, QuickBooks® files can be anywhere on the local network. The data mart is generated and installed on the same computer where the software is installed and is not to be shared among multiple users.

This edition will only let you access one QuickBooks file at a time (you need to switch between files). If you want to compare or integrate files, you need the Consolidation edition.

- **O. ACCOUNTANT ONE YEAR:** A database component is installed in a company's computer with QuickBooks installed. This component synchronizes the data from up to 20 QuickBooks files selected. Includes a reporting user with database and all available stars.
Product code: LIC-RVSE-AC-ALLCUB
- **P. 100 ADDITIONAL FILES:** The Accountant edition starts with a limit of 20 QuickBooks files. If you want to include more files, you need to license access to 100 additional files.
Product code: LIC-RVSE- AC-100F
