

Choose the best Radial Viewer SE Edition for you:

Each user includes one multidimensional star (cube) of your choice; the stars are licensed for each user (not the server). You can buy additional stars for each user, according to your needs. The stars available are: Sales, Accounts Receivable, Transactions and Jobs.

Use the product codes for reference in our Store.

Single User: AVAILABLE NOW!

This edition is designed for a single user accessing information from a single company.

- This edition should be installed on the same computer where QuickBooks® is running.
- For updating purposes, QuickBooks® files can be anywhere on the local network.
- The data mart is generated and installed on the same computer where the software is installed and is not to be shared among multiple users.

Product codes: LIC-RVSE-SU-SC-01, LIC-RVSE-SU-AR-01, LIC-RVSE-SU-JC-01, LIC-RVSE-SU-TC-01

Note: If you want to have several users in your company, the Multi-user Edition is better. If you still want to install the single edition to many users, beware that each user will have a full copy of the data, wasting disk space and resources, and each one is responsible to synchronize his data from *QuickBooks®* files.

Note: This edition will only let you access one QuickBooks file only. If you want to switch between files you must buy the Accountants. If you want to compare or integrate files, you need the Consolidation edition.

Note: The user includes one star of your choice; you can include additional stars as you need.

Product codes: CUB-RVSE-SC-SC-01, CUB-RVSE-SC-AR-01, CUB-RVSE-SC-JC-01, CUB-RVSE-SC-TC-01

Multi user: AVAILABLE NOW!

This edition is intended to be used for more than one user in the same network, accessing information of a single company.

- A server component is installed in a company's computer. This component synchronizes the data from QuickBooks. This component has to be purchased separately, and does not include a reporting user.
Product code: LIC-RVSE-MU-SERVER
- For each user you need to buy one Client edition. They connect automatically to the server component, so each user doesn't need access to the QuickBooks program nor the QuickBooks file.

Product codes: LIC-RVSE-CL-SC-01, LIC-RVSE-CL-AR-01, LIC-RVSE-CL-JC-01, LIC-RVSE-CL-TC-01

Note: Stars must be purchased for each user that needs it (each star bought can be licensed for one user only). For example, you can have one user with the sales star, other with the jobs star, and another one with the transactions star and the accounts receivable star.

Product codes: CUB-RVSE-SC-SC-01, CUB-RVSE-SC-AR-01, CUB-RVSE-SC-JC-01, CUB-RVSE-SC-TC-01

Consolidation: *AVAILABLE NOW!*

This edition is designed for companies or groups of companies who operate *QuickBooks®* using separate files but need to consolidate that information to create integrated reports, graphs and dashboards. Cases include different companies from the same share holders; companies with different branches, each branch using a separate *QuickBooks* file; or companies and branches located in different countries.

This edition serves to consolidate information from different *QuickBooks®* files in one data mart so the user can analyze information and generate reports including the Company/Branch dimension in the stars. It is useful for consolidation and comparative purposes for a company who has different branches or operation points with independent *QuickBooks®* files.

- A server component is installed in a company's computer. This component synchronizes the data from several *QuickBooks* files and consolidates them in a single database. This component has to be purchased separately, and does not include a reporting user.
Product codes: LIC-RVSE-CE-SERVER
- The synchronization component starts with a limit of 3 *QuickBooks* files. If you want to consolidate more files, you need to license access to 1 additional file or packages of additional 5.
Product code: LIC-RVSE-CF-01, LIC-RVSE-CF-05
- The consolidation user works in multi-user environment. You can purchase additional users with one star of your choice that connect to the server and access the consolidated files.
Product codes: LIC-RVSE-CL-SC-01, LIC-RVSE-CL-AR-01, LIC-RVSE-CL-JC-01, LIC-RVSE-CL-TC-01
- You can purchase additional stars, according to your needs.
Product codes: CUB-RVSE-SC-SC-01, CUB-RVSE-SC-AR-01, CUB-RVSE-SC-JC-01, CUB-RVSE-SC-TC-01
